typically manuals of pediatric hematology oncology are written by specialists from high income countries and usually target an audience with a sub specialist level of training often assisted by cutting edge diagnostic and treatment facilities however approximately 80 of new cases of cancer in children appear in mid and low income countries almost invariably general practitioners or general pediatricians without special training in oncology will look after children with malignancies who enter the health care system in these countries the diagnostic facilities are usually limited as are the treatment options the survival figures in these conditions are somewhere below 20 while in high income countries they are in the range of 80 for many childhood cancers pediatric hematology oncology in countries with limited resources is the only book of its kind to provide specific guidance applicable to limited resource settings and builds up from the foundation of general practitioner or general pediatrician competence written and edited by leaders in the field this manual educates physicians on the essential components of the discipline filtered through the experience of specialists from developing countries with immediate applicability in the specific healthcare environment in these countries

the definitive reference on pediatric oncology is now in its thoroughly revised updated fourth edition a multidisciplinary group of the world s foremost specialists presents state of the art information and guidelines on every aspect of pediatric cancer from molecular biology to diagnosis multimodal therapy and supportive care this edition features greater integration of the biologic and genetic factors affecting diagnosis and

treatment new chapters discuss incidence and trends in childhood cancer evolving molecular and targeted therapies and training strategies to develop humanistic skills in the pediatric hematologist oncologist also included are up to date listings of support resources for children with cancer and for their families and physicians a brandon hill recommended title

this book is a comprehensive text on the all important psychosocial aspects of cancer in children edited by an experienced psycho oncologist and an equally experienced pediatric oncologist the book brings together an international group of contributors composed of pediatric oncologists and psychologists psycho oncologists this unique balance of contributors gives the book a focus on the real life practical aspects of children undergoing treatment for cancer the book helps health care professionals who look after children and adolescents with cancer in dealing with the difficult and complex problems that face the child his siblings and his parents it deals with critical issues such as the neuropsychological impact of treatment including bone marrow transplantation pain quality of life in survivors palliative care talking to children and their families about death and providing support to the dying an important part of the book provides tools for evaluation and methods of psychological intervention it is thus a very practical work for psycho oncologists pediatric oncologists pediatricians psychologists nurses social workers and art therapists dealing with the problems that children with cancer have to confront a comprehensive book on the clinical approach to psychosocial problems of children with cancer includes evaluation tools and psychological intervention techniques contributions from both pediatric oncologists and psycho oncologists highlight the team approach to the treatment of childhood cancers

childhood cancer was almost always fatal before 1970 today 80 of children diagnosed with cancer will survive at least 5 years 70 will be cured however cancer continues to be the leading cause of nonaccident related deaths in children more children die each year from cancer than from celiac brosis diabetes asthma aids and congenital abnormalities combined nine children die from cancer every school day despite the fact that pediatric cancers account for only a small percentage of the total cancer burden more effective therapies are needed to improve mortality rates in children therefore our research priority must be the development of new agents and new therapies for childhood cancer m d anderson cancer center has been caring for children with cancer since its doors opened over 60 years ago this institution has been home to several research and clinical pioneers whose innovative work has influenced and shaped the practice of pediatric oncology throughout the world notably drs wataru w sutow donald pinkel and norman jaffe have been credited with introducing curative therapies for children with leukemia and solid tumors cancer treatment involves far more than administering chemotherapy and surgically excising tumors it requires a multidisciplinary approach to patient management particularly in the treatment of solid tumors which pose the biggest challenge in cancer care today surgery and radiotherapy as well as radiographic and pathologic assessments of response are critical factors in the treatment of children with cancer

this book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework the spectrum of topics covered is wide including for example symptom management self care management exercise and physical activity family centered care palliative care the role of the nurse in treatment decision making patient and nurse resiliency survivorship and genetic counseling throughout there is a focus on the implications of research for nursing practice highlighting which elements of the available evidence are ready for translation into practice and which are not in addition careful attention is paid to the role that nursing can play in further advancing science through clinical research the authors are leading experts from across the globe the book will be of special interest for pediatric oncology nurses including direct care nurses research nurses and nursing leaders and will also be a stimulating source for researchers and non oncology nurses

this textbook walks clinicians through the psychosocial issues and challenges faced by children and adolescents with cancer and their families through a developmental lens the text provides guidance and resources that will enable clinicians to understand the physical and emotional impact of the disease from diagnosis onwards to work with families in distress and to diagnose and treat a range of behavioral psychological and psychiatric issues the book also addresses the burgeoning fields of social media

complementary therapies palliative care and survivorship among the variety of useful resources supplied are assessment tools websites and additional reading materials the psychosocial issues that arise for children and their families during the course of treatment are an important yet often overlooked aspect of pediatric oncology care the reader will find that pediatric psychosocial oncology textbook for multidisciplinary care covers these issues at the forefront of clinical care in a direct and approachable way integrating research literature with practical clinical guidance

the new and updated edition of the renowned reference for pediatric oncologists this groundbreaking text on the management of childhood cancers covers most tumor types occurring in children and young adults and provides reviews of randomized trials with commentaries on the optimum treatments for childhood cancer updated with evidence from the latest published reviews and even more clinically focused than previous editions evidence based pediatric oncology third edition places an emphasis on application of the trial findings with increased coverage of the area of supportive care for pediatric cancer patients each chapter opens with an expert commentary on the key clinical issues followed by a summary of trial findings evidence based pediatric oncology third edition presents evidence for the best treatment of children and adolescents with cancer includes commentaries from the world's leading experts for every topic discussed is internationally relevant thanks to contributions from the UK US Canada and Australia places greater emphasis on supportive care and features a new extended section on antibiotic and antifungal treatments based on information gathered from randomized trials performed after the release of the second edition readers will find evidence based pediatric oncology to be an important resource for all those treating young people with cancer

this textbook is the first to focus on comprehensive interdisciplinary care approaches aimed at enhancing the wellbeing of children with cancer and their families throughout the illness experience among the topics addressed are the epidemiology of pediatric cancer distress including physical emotional social and spiritual dimensions the role of the interdisciplinary team communication and advance care planning symptom prevention and management care at the end of life family bereavement care and approaches to ease clinician distress the contributing authors are true experts and provide guidance based on the highest available level of evidence in the field the book has not only an interdisciplinary but also an international perspective it will appeal globally to all clinicians caring for children with cancer including physicians nurses psychosocial clinicians and chaplains among others

three of every four children and adolescents with cancer can now be cured however physicians are using increasingly intensive treatment regimens these treatments can expose patients to toxic chemotherapeutic agents invasive surgical procedures and radiation oncology interventions that risk disfigurement neuropsychiatric damage and life threatening organ toxicity these potentially dire consequences have mandated that advances in cancer treatment go hand in hand with supportive care measures that sustain patients through their therapeutic ordeal and allow each patient to achieve maximum quality of life in this book now in its third edition the discipline of supportive care in pediatric oncology is covered in depth supportive care of children with cancer is a ready reference handbook designed for use at the hospital bedside in the oncology outpatient clinic or in the physician's office to create this book leading experts in the field recommended approaches to supportive care which were then critically reviewed by members of the children's oncology group the world's largest cooperative study group for children's cancer for students house officers fellows pediatric oncologists surgeons nurses nutritionists social workers and psychologists this book provides essential information about the care of pediatric oncology patients the third edition features a new chapter on recognition prevention and remediation of burnout in pediatric oncology staff members while throughout the book chapters have been revised and updated to reflect the impact of new antibiotic agents new antiemetics and new approaches to pain management

like the ground breaking first edition pediatric psycho oncology second edition puts the child at the centre of medical and psychological care it broadens the focus beyond treatment and cure to consider the quality of life of the child and their family written by an international group of pediatric oncologists and psychologists psycho oncologists brought together by an expert editorial team it focuses on the real life practical aspects of children undergoing treatment for cancer this edition has been restructured and

opens with a major section on active treatment which includes chapters addressing quality of life pain psychosocial aspects of treatment and interventions art therapy and different fantasy based techniques palliative care communication and education as well as a new chapter on psychopharmacology shorter sections then discuss survivorship and care of the dying child including a new chapter on bereavement the final section comprises new chapters on ethical considerations and on addressing the emotional needs of children whose parents have cancer as well as a case study on international collaboration an appendix provides a comprehensive overview of tools for evaluation and assessment in pediatric psychooncology this book is a highly practical resource that will be invaluable for all health care professionals looking after children and adolescents with cancer praise for the first edition a welcome addition to the field i highly recommend it to all health care professionals involved in the treatment of childhood cancer patients journal of the american medical association november 2004

to address the growing complexities of childhood cancer nathan and oski's hematology and oncology of infancy and childhood has now been separated into two distinct volumes with this volume devoted strictly to pediatric oncology and another to pediatric hematology you will be on the cutting edge of these two fields this exciting new full color reference provides you with the most comprehensive authoritative up to date information for diagnosing and treating children with cancer it brings together the pathophysiology of disease with detailed clinical guidance on diagnosis and management for the full range of childhood cancers including aspects important in optimal supportive care written by the leading names in pediatric oncology this resource is an essential tool for all who care for pediatric cancer patients offers comprehensive coverage of all pediatric cancers including less common tumors making this the most complete guide to pediatric cancer covers emerging research developments in cancer biology and therapeutics both globally and in specific pediatric tumors includes a section on supportive care in pediatric oncology written by authors who represent the critical subdisciplines involved in this important aspect of pediatric oncology uses many boxes graphs and tables to highlight complex clinical diagnostic and management guidelines presents a full color design that includes clear illustrative examples of the relevant pathology and clinical issues for quick access to the answers you need incorporates the codified who classification for all lymphomas and leukemias
